

Expand GrandFabric Outdoor

Take your message outdoors

The Expand GrandFabric Outdoor is the world's first portable outdoor graphic backwall.

Features & Benefits:

- Uses the same frame as the Expand GrandFabric (9.5' & 7.6')
- No tools required –very fast and easy set up
- A durable, rugged design to withstand tough transportation and harsh weather conditions
- Aluminum, stainless steel hardware –protects from corrosion.
- Can withstand a max windspeed of 20 m/p (with two water tanks)
- Completely re-brandable
- Can be showcased on most level surfaces, such as: asphalt, sand, grass, and concrete.

Graphics made for outdoors

Expand uses a pillow-case graphic system that slips over the Expand GrandFabric frame. The material used for outdoor graphics is water resistant and has a 6 month limited lifetime warranty against fading. Straps on the support feet slip through small sewn slits on the bottom of the graphic and lock in place to prevent movement. The material is pulled tight to resist wrinkling and ensure your message is viewed clearly with no obstructions.

Support from behind

The Expand GrandFabric Outdoor feet come with two built-in support bars with 360° hinge clamps that hold onto the sides of the frame and lock it in an upright position. The feet are secured in place by a weight bar that folds out and fits across the top of both feet from behind. Additional weight should be added to this support bar. Options include: full water tank kits, ground stakes or your own weight solution.

Pack it up and go

Our recommended solution for transporting the Expand GrandFabric Outdoor includes an Expand PodiumCase for the frame and hardware along with a custom round shipping case for the feet and support bar. Both cases include wheels for easy mobility and protect the hardware during transport.

Do you already have an Expand GrandFabric?

If you already own a 7.6' or a 9.5' wide Expand GrandFabric frame, you can simply order a customizable Expand GrandFabric Outdoor Kit with support feet, outdoor graphic and bar to connect easily to your existing frame.

Dimensions:

115.75" x 94.5"
91.3125" x 94.5"

Weight:

Frame: Approx. 30 lbs. (115.75" x 94.5")
Feet & Weight Bar: Approx. 47 lbs.

Frame: Approx. 23 lbs. (91.3125" x 94.5")
Feet & Weight Bar: Approx. 44 lbs.

Parts:

Frame hardware
